

For Immediate Release

Dispensing Dynamics International Joins the Hunter Industries Family of Companies

SAN MARCOS, California — June 16, 2017

Today, Hunter Industries is pleased to announce the acquisition of Dispensing Dynamics International (DDI), launching an exciting new chapter in the future of both companies.

Headquartered in City of Industry, California, DDI specializes in the development of unique dispensing solutions for towel, tissue, wiper, napkin, and air care products. DDI's strengths in design, prototyping, engineering, and manufacturing leads to customer solutions unsurpassed in performance, quality, and ease of use.

Hunter is an established global leader in the development of residential, commercial, and golf course irrigation solutions, as well as the landscape lighting and custom manufacturing sectors. The acquisition will allow Hunter to expand into a new market that will diversify its business operations and grow its customer base while working with familiar materials and processes. Like Hunter, DDI differentiates itself by creating innovative products and solutions that minimize the use of natural resources.

"The acquisition of DDI allows Hunter Industries to leverage its global manufacturing and logistics expertise in a new and exciting market," said Greg Hunter, President of Hunter Industries. "We look forward to building on DDI's legacy of innovation in the dispensing category as we embrace this opportunity to diversify Hunter Industries."

Much of Hunter's success has come from living its core values of customer satisfaction, innovation, family, and social responsibility. DDI shares the same values and is a welcome addition to the Hunter family of companies, joining landscape lighting company FX Luminaire; commercial architectural lighting company Holm; molding and manufacturing company Hunter Custom Manufacturing; and agricultural irrigation company Senninger.

About Hunter Industries

Hunter Industries is a global manufacturer of products for the irrigation, landscape lighting, and custom manufacturing sectors. Founded in 1981, the family-owned company offers more than 1,000 products including a complete spectrum of water-efficient solutions for residential and high-end irrigation systems. Hunter's core mission always has and always will remain the same: to produce innovative products of the highest quality and back them with unwavering customer support.

About Dispensing Dynamics International

Founded in 1932, DDI reflects a unique combination of integrated capabilities and resources that enable us to create, produce, and support the most advanced dispensing solutions in the world. We know that dispensers are the cornerstone of our customers' businesses. Our best-in-class solutions help our customers define their product offerings and set their systems apart from the competition.
